Summary

I have a passion for solving complex technical challenges. I am skilled in a variety of programming languages and frameworks. I am a team player and excel in collaborative environments, but also have the ability to work independently when needed. I am constantly seeking to learn and grow as a professional, and am excited to explore new opportunities and continuously upgrade my knowledge and skills in the field of software engineering.

Experience

Associate Software Engineer

Casepoint LLC

May 2022 - Present (10 months)

As an Associate Software Engineer, I develop and test software modules to meet specific requirements and time constraints while adhering to coding standards and following instructions from superiors. I manage code changes using version control systems, prepare technical documents for resolved requests, and follow standard procedures for escalating unresolved issues to the appropriate internal teams. In my role, I contribute to the development of high-quality, innovative software that complies with coding standards and technical design using my expertise in ASP.NET, MVC, C#, and MS SQL Server. I also utilize my skills in JavaScript, jQuery, and Web API to enhance my work. My knowledge of PGSQL and Kendo UI for jQuery has also proven to be valuable in my role. I provide daily activity reports to Reporting Manager and adhere to the procedures of the organization.

Software Engineer Intern

Casepoint LLC

Jan 2022 - May 2022 (5 months)

I worked on project named CampusTitan (Campus Recruitment System). The main objective of project is to streamline the recruitment and hiring process for companies.

Education

Government Engineering College (GEC) Bhavnagar

Bachelor of Engineering - BE, Computer Engineering

Jul 2018 - May 2022

Skills

Python • Object-Oriented Programming (OOP) • JavaScript • Machine Learning • Data Structures • ASP.NET Web API • Natural Language Processing (NLP) • C# • Git • GitHub
